

**Peace.
Love.
Hackerness.**

Come to the Causes office to join fellow developers and hack on the Facebook Platform!

Thursday, November 19, 2009
6:30pm - 9:30pm

The Causes Office
2105 Martin Luther King Jr. Way
Berkeley, CA 94704

Whether you're just getting started with building Facebook apps or have been on the platform since the beginning, there's a spot here for you. Developers of all backgrounds will be present and available to answer any questions, talk about experiences, and maybe jump in for some pair programming.

Causes was built on top of the Facebook Platform since the very beginning, growing to become one of the largest apps (and raising over \$17 million for nonprofits in the process). We want to share what we've learned, and give back to the developer community.

Our event will be developer-focused—no business cards, just code.

Space is limited. RSVP at <http://causes.com/garage>.
